

Self-service and checkouts

FLEXIBLE HARDWARE INTEGRATION

Choose your preferred hardware supplier and continue to upgrade and adapt your front-end zone when new technology comes onto the market. This makes the SLIM range a versatile and future-proof solution for the retailer of today and tomorrow.

CUSTOMISATION POSSIBILITIES

As well as having a job to do, checkout furniture also has to fit seamlessly into your store design. Customisation options include a wide choice of dimensions, conveyor belt lengths and accessories. Choose your preferred colour or finish and add extra signage or digital screens to your liking.

MODULAR, SUSTAINABLE DESIGN

The modular design of the SLIM range seamlessly meets the needs of every retailer. Whether it concerns payment points in a small city store or setting up the layout of a complete front-end, the SLIM line family will make it possible. Next to that, the range is up to 95% recyclable and made out of sustainable materials.

SLIM SCO Express

Reduce the footprint of your self-checkout solution without compromising on functionality. The SLIM SCO Express is the ideal self-scanning checkout for stores with a small retail footprint such as convenience stores, bookshops and post offices.

SPECIFICATIONS

- Touchscreen
- Pin & chip holder
- Ticket printer
- Scanner
- Micro-pc

OPTIONS

- Bag hooks
- Worktop for baskets
- Power pole
- LED signage

SLIM SCO Standard

A compact self-scanner where customer ergonomics is the priority: customers' baskets are at exactly the right height, so they can scan products and place them in their shopping bag in one continuous movement.

SPECIFICATIONS

- Touchscreen
- Pin & chip holder
- Ticket printer
- Scanner

OPTIONS

- Curved or flat worktop
- Left or right orientation
- Bag hooks
- Hand scanner
- Impulse options
- Power pole
- LED signage

SLIM SCO Balance Small

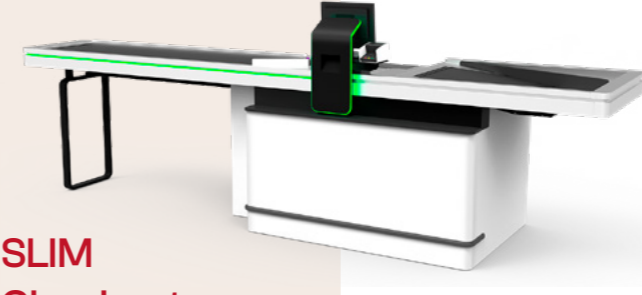

Save space with this intuitive self-checkout designed for a modern cashless checkout process. By combining a big retail grade scanner with the newest technologies, your store will be ready for the future.

SPECIFICATIONS

- Touchscreen
- Pin & chip holder
- Ticket printer
- Scanner & scale
- For quick shoppers

OPTIONS

- Left or right orientation
- Bag hooks
- Hand scanner
- Top-mounted camera for fraud detection
- Power pole
- LED signage

SLIM Checkout

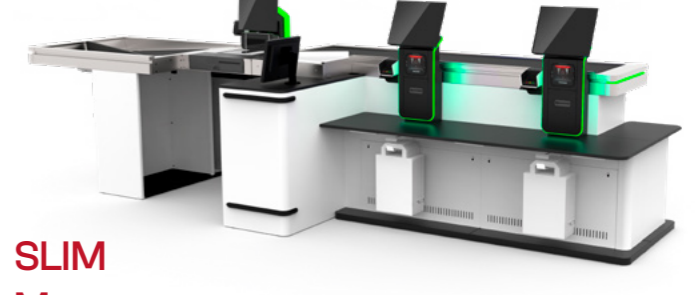

A front-end checkout with a uniform appearance that gives you the flexibility to customise the checkout and its components to match your brand's look and feel. The SLIM has easily recognizable touchpoints including the core and smart LED lighting to further optimize your customer flow and experience.

SPECIFICATIONS

- Modular design
- Hardware independent
- Different executions
- Customisable look & feel
- High serviceability
- Manned checkout

OPTIONS

- Left or right orientation
- Single & back-to-back
- Impulse shelves
- Power pole
- LED signage
- Security camera
- Extended rear
- Bag hooks
- Backplate
- Island set up
- Electronical or mechanical gates
- Option to integrate loyalty card reader

SLIM Merge

A unique combination of one or more self-checkouts with a conveyor belt checkout. One operator can easily handle both areas, plus it makes extra efficient use of all available space in-store. An important bonus that guarantees a smooth flow of customers in stores where space is at a premium.

SPECIFICATIONS

- Modular design
- Hardware independent
- Different executions
- Customisable look & feel
- High serviceability
- Manned checkout and self-service in one

OPTIONS

- Left or right orientation
- Impulse shelves
- Power pole
- LED signage
- Mechanical or electronical gates
- Security camera
- Bag hooks

SLIM SCO Balance Large

The SLIM SCO Balance Large is the powerhouse when it comes to self-checkout. Its moderate size packs everything from traditional checkout solutions with cash management to modern security vision technology, all important benefits that make the self-checkout process smooth and secure.

SPECIFICATIONS

- Touchscreen
- Pin & chip holder
- Security scale to help reduce fraud
- Scanner & scale
- Ticket printer
- Suitable for big basket sizes

OPTIONS

- Left or right orientation
- Bag shelves
- Impulse options
- Hand scanner
- Top-mounted camera for fraud detection
- Integrated cash management system
- Power pole
- LED signage
- Coupon box

SLIM SCO Bench

The SLIM SCO Bench offers the possibility to create a self-checkout bench or island. The bench contains 2 or 3 SLIM Core Units and can be placed either single or back-to-back depending on the available space in your store.

SPECIFICATIONS

- Touchscreen
- Pin & Chip holder
- Ticket printer
- Scanner

OPTIONS

- Left or right orientation
- Bag hooks
- Hand scanner
- Power pole
- LED signage
- Backplate

SLIM MCE

The standard SLIM MCE is a sturdy basket checkout with a counter for shopping baskets. In urban and smaller supermarkets, these basket checkouts make it easy and ergonomic for operators to handle, scan and process items. There is also scope to add a small conveyor belt, depending on store requirements.

SPECIFICATIONS

- Modular design
- Hardware independent
- Small footprint
- Flat plateau
- Option to integrate loyalty card reader

OPTIONS

- Left or right orientation
- Basket plateau
- Belt
- Impulse shelves
- Power pole
- LED signage
- Easy to add modules

SLIM Massive

The SLIM MASSIVE is a counter module that combines the service counter with regular checkout points in a supermarket. It is equipped with a front and rear belt. Because this counter is completely enclosed underneath the belts, it creates a lot of storage space. The SLIM MASSIVE is available with different front and rear belts.

SPECIFICATIONS

- Modular design
- Hardware independent
- Different executions
- Customizable look & feel
- High serviceability
- Manned checkout

OPTIONS

- Left or right orientation
- Bag hooks
- Hand scanner
- Power pole
- LED signage
- Backplate
- Island set up
